Reflection on this assignment!

I found this assignment quite interesting as I got to know about css styles and many other tags. I got to know how to make your own websites adding images to the websites and selling products. HTML is a markup language and is used to create web pages and make the webpage both functionally and visually appealing. In this assignment, different types of tags are used to structure the content of a web page to provide information about the page and define the elements like headings, Paragraphs, etc.
